

Projects Under Construction

County Wide Annual Pavement Management Program:

- Pavement Management
 - Preservation – Prepare plans to rehabilitate county roadways by various methods such as microsurfacing, and crack seal.
 - Rehabilitation – Mill and resurface roadways..
- Pavement Markings
 - AKCA is under contract with Sumter County to restripe various roadways throughout the county.

C-468 Four Lane (From Turnpike to South of SR 44)

The rebuilding of this roadway from a two-lane to a four-lane will serve to accommodate existing and future growth and development on C-468 and in the surrounding area. The design is 100% complete and has been submitted for SWFWMD permitting.

C-469

Project scope and schedule for C-469, from C-48 to SR 50 (approximately 5.7 miles in length); Mill and resurfacing for the entire length and paved shoulder on each side of roadway. Paved shoulders will enhance the safety for both autos and truck traffic using this road. This roadway serves the Center Hill Community and connects with SR 50 at its southern terminus. This project is under design, construction will begin November 2012.

CR 529A

Project is approximately 1 mile long, road is east of the Sumter County Landfill, off of C-470. Sumter County will apply 2” of open grade and cap it with friction course.

C-48

Rehabilitation of C-48 from SR 471 to 1 mile west of SR 471. The method to improve that section of C-48 is to widen (non-capacity), resurface, and rehabilitate C-48 by widening the existing land width to twelve foot travel lanes, adding two foot paved shoulders and improving the clear zone recovery areas within the existing limited right of way.

CR 542

Widen and resurface US 301 to C-475 S, for a total length of approximately 2,000 feet.
